

INTERNATIONAL HYBRID BUSINESS ENTERPRISE MARKETING POLICIES

Our company is committed to facilitate and manage successful business between suppliers and customers at regional, national and international levels. Our mission is to provide efficient and effective solutions that promote the growth and prosperity of both parties.

Legal Compliance

Our business will be governed by applicable international and local laws and regulations. We are committed to complying with all regulations related to international trade, including import and export laws, international sanctions and any other relevant legislation.

Confidentiality and Data Protection

We will respect the confidentiality of the information provided by our suppliers and customers and those who interact at the business table. We are committed to protecting personal and business data in accordance with applicable privacy and data protection laws. We will only use the information for business purposes and will not disclose it to third parties without prior consent.

Evaluation and Selection of Suppliers

We will conduct a thorough evaluation of potential suppliers before entering into a business relationship. We will consider factors such as the quality of the products or services offered, the ability to meet delivery schedules, and the supplier's reputation and experience. We will strive to establish long-term relationships with reliable and ethical suppliers.

Establishment of Contracts

When entering into a business relationship, we will establish clear and detailed contracts with our suppliers and customers. These contracts should include commercial terms and conditions, prices, delivery terms, responsibilities and any other relevant information. We will work in collaboration with our legal advisors to ensure that contracts are fair and equitable to both parties.

Conflict Resolution

In the event of disputes or conflicts, we will seek amicable and negotiated solutions. If it is not possible to reach an agreement, we are committed to using alternative means of dispute resolution, such as mediation or arbitration, rather than litigation in court. These options will allow for a quicker and less costly resolution of disputes, while maintaining a positive business relationship.
